

Pro-Stat® Case History #39

Janel Savage of OPTION 1 Nutrition Solutions, a specialized company in the home care field that focuses on Enteral Therapy, called Medical Nutrition USA to speak about Pro-Stat® AWC. In her words:

“I am calling to say that three times in the last week I've heard that Pro-Stat AWC is wonderful! My customer yesterday said she has a dialysis patient that recently underwent amputation. The patient has healed very well and rather quickly, and the dialysis NP and MD are just amazed. I think they started her on AWC right before surgery to help the healing process.

I actually met a patient who recently started the AWC, and he is so pleased that his healing is going so well, he may NOT need any more amputation on the foot! I'm going to hit a few more dialysis clinics this week, and the Diabetes Wound Center at Presbyterian/St. Lukes as well. I spent over 20 yrs in dialysis and so wish this had been on the market sooner! I am so pleased there are products now to help keep the effects of this terrible disease to a minimum.”

Thank you, Janel, for sharing your story. Experiences such as yours warm our hearts and provide continuing validation of the effectiveness of our products.
